Software Process Dashboard Initiative

<http://processdash.sourceforge.net>

The Software Process Dashboard Project is an open-source initiative to create a Personal Software ProcessSM (PSPSM)/Team Software ProcessSM (TSPSM) support tool. The Process Dashboard is an existing support tool originally developed in 1998 by the U.S. Air Force, and has continued to evolve under the open-source model. It is freely available for download under the conditions of the Gnu's Not Unix Public License. The Process Dashboard supports data collection, planning, tracking, data analysis, and data export. The major strengths of the Process Dashboard are ease of use, flexibility/extensibility, platform independence, and price. The Team Process Dashboard is currently under development.

Software Engineering Institute

www.sei.cmu.edu

The Software Engineering Institute (SEISM) is a federally funded research and development center sponsored by the Department of Defense to provide leadership in advancing the state of the practice of software engineering to improve the quality of systems that depend on software. SEI helps organizations and individuals improve their software engineering management practices. The site features complete information on models the SEI is currently involved in developing, expanding, or maintaining, including the Team Software ProcessSM, Personal Software ProcessSM, Capability Maturity Model[®] Integration, Capability Maturity Model[®] for Software, Software Acquisition Capability Maturity Model[®], Systems Engineering Capability Maturity Model[®], and more.
